

Maximize cash flow with real-time, AI-powered AP automation

Quickly gain complete control of your payment processes with OpenEnvoy's enterprise-grade, AI-based AP automation solution and never overpay an invoice.

Transform your AP with 10X ROI:

AI-powered digitization

Extract and classify line-item level variable cost invoice content in real-time at unparalleled speed and with 100% accuracy.

Experienced AP automation

Accelerate invoice auditing and reconciliation with no user intervention. Automatically identify overbillings and eliminate duplicates to prevent overpayment while leveraging early payment discounts and better credit terms.

Automatic GL coding

Invoice line items are automatically assigned the correct GL codes, eliminating the need for review and approval workflows.

Actionable insights

Executive dashboards for real-time tracking of KPIs, spend patterns, vendor performance, and spend visibility for better cash flow forecasting, to reduce operational costs, and improve vendor management.

About OpenEnvoy

OpenEnvoy uses enterprise-grade AI technology to provide finance teams with complete control over their payment processes. Our AP automation solution eliminates overpayments, controls fraud and errors, and maximizes cash flow, all with total visibility.
