OpenEnvoy

The world's first real-time freight audit

Legacy freight audit providers often need to perform several audits including pre, post, and second post audits before recovering wasted spend, taking anywhere from 30 days to six months. OpenEnvoy is the first and only freight audit solution to complete a full audit of every invoice before you pay so that you never get overcharged by your providers.
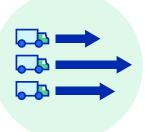

Torovoy is your least accurate provider. ⚠

OpenEnvoy guarantees ROI with the following:

Immediate cashflow

OpenEnvoy automates a full audit of your freight invoices including hundreds of forensic level validations such as container location, shipment times, and supplier verification before you pay.

Provider scoring

Track provider billing performance over time to ensure you receive the highest quality of service.

Clean data

Every piece of text from every invoice, contract, quote, B/L, shipping instruction, etc. is extracted, normalized and available via API so that your system(s) of record via TMS, ERP, and RMS remain your source of truth.

About OpenEnvoy

OpenEnvoy audits every invoice before you pay, preventing billions of dollars in wasted spending. To learn more, visit **https://openenvoy.com**.
